Dipanjana,

Eric sent these guidance pages regarding the fish risk assessment at Gulfco in support of their fraction ingestion factor and not including children. Does their risk assessment look reasonable in light of this, or is there some other reason why their approach isn't appropriate? I'm thinking of deleting the comments that require inclusion of children & removal of the fraction ingestion factor if you agree.

Thanks,

Gary Miller

Hi Gary -

Per our discussion yesterday, here are the sections from EPA guidance that I mentioned.

Please let me know if you have any questions.

Thanks.
